K-State Salina: College of Arts and Sciences
Technology Management

Overview
Technology management combines a marketable skill learned at the university level with the management education necessary to allow for rapid advancement in the industry. Technology management students take courses in management, accounting and marketing, as well as other critical elements of business. The technology concentration consists of university-level training in nearly every skill area except business.

Professional options

Careers
Technology management graduates are prepared for supervisory, sales, product development and management positions in a variety of skill areas, ranging from traditional technological fields such as computer systems, engineering technology, diesel mechanics, and aviation maintenance to health care, fire science and even fine arts. Our graduates have accepted positions with small companies, major international corporations and everything in between.

Academics

Degree options
Programs offered at K-State Salina include:

- Aviation maintenance
- Computer systems technology
- Construction engineering technology
- Digital media
- Electronic and computer engineering technology
- Family studies and human services
